## Chain Hung

### IMPORTANT TURN OFF THE POWER AT THE MAIN FUSE OR CIRCUIT BREAKER BOX BEFORE STARTING INSTALLATION

Carefully unpack and identify all parts before assembly. Bulbs not included.

1. Install the top of the arms onto the top of the fixture using the set screws provided, as shown on diagram.
2. Install the bottom of the arms onto the bottom font using the set screws as shown.
3. Install the top cover and the fixture loop onto the top of the fixture.
4. Place the bottom cover, with the attached threaded pipe, on top of the bottom font. Then slide the bottom cap through the threaded pipe onto the bottom font and secure it with the finial.
5. This fixture can be mounted onto ceiling either as chain hung or flush mount:

#### CHAIN HUNG INSTALLATION:

- A. Take fixture wire (with plastic insulation) and ground wire and thread through fixture loop. Then install loop onto threaded pipe located at top of fixture.
- B. This fixture is supplied with 2 threaded chain links. These links are opened and closed by twisting cylinder on chain link. One threaded chain link should be installed onto canopy loop and the other should be installed onto fixture loop. The standard chain should be installed in between these 2 threaded chain links.
- C. Determine the desired length of chain to hang. Remove any unwanted links with chain plier.
- D. Take ground wire and weave through above chain links, then thread through center hole in canopy loop. Repeat with fixture wire (wire with plastic insulation).

#### FLUSH MOUNT INSTALLATION:

- A. Remove and discard canopy loop and fixture loop.
  - B. Thread ground wire and fixture wire through fixture plate, lock washer, and hex nut. Lock all together on top of fixture by tightening hex nut onto threaded pipe.
6. Cut excess wires leaving only 6" (15cm) length of wires above canopy. Split fixture wire into two strands. Then strip off 3/4" (19mm) of outer plastic insulation.
  7. Follow enclosed supplement installation instructions for electrical and fixture installation onto house outlet box. If you do not have an outlet box at desired location to attach the fixture then hire a qualified electrician to create one.
  8. Install light bulb (not included). See relamping label at socket area for type and maximum allowed wattage.  
Note: Slightly spread the metal cage to install or replace the bulb.
  9. Hang all crystal glass parts as shown on drawing.  
NOTE: Replace broken drop or pin by gently bending open the pin, remove the broken drop or pin, hook the new one, then close back the pin. Avoid bending the pin into a sharp angle.
