

Brisa 2000

The Brisa 2000 is our most unique rotational ceiling fan. Like satellites orbiting a planet, the Brisa's select mahogany blades and lunar counterweight gently orbit about its spherical gear housing. The motor head can be infinitely positioned in a 180-degree arc for optimum air movement; the greater the angle of the motor to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both motor head position and fan blade speed. The Brisa is available in these standard finishes: polished chrome, brushed nickel, polished copper, bronze or black. White, brushed copper, polished brass, brushed brass, black nickel and bronzette are available as special orders. Bronzette, incidentally, is our monochromatic powder-coated bronze finish.

- Matthews rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans.
- Constructed of cast aluminum, heavy spun and stamped steel, the Brisa carries a limited lifetime warranty.
- Each unique motor mount and fan head knob is made of genuine marbleized Bakelite.
- The Brisa is available with the following blade options:
 - metal blades with decorative metal blade guards
 - solid, ecologically harvested mahogany blades without blade guards
 - metal blades with metal safety cages for use in low ceiling applications (7 ft in US / 8.2 ft in Canada)

Standard Finishes

bronze	brushed nickel	black
polished chrome	polished copper	

Special Order Finishes

polished brass	black nickel	brushed brass
brushed copper	white	bronzette

Brisa 2000

weight: 21 lbs
voltage: 110*

The Brisa can be mounted with any one of the following downrod lengths: 5, 10, 20, 30, 48 or 72".

- The downrods can be easily field cut; they are not threaded.

The Brisa 2000 is compatible with flat or vaulted ceiling canopies.

All fans best regulated by variable speed wall controls.

Metal bladed fans with protective powder or clear coatings are suitable for Damp Location.

Safety cages available for low ceiling applications.

*Please contact us for possible 220V conversions.
