

Find It! 123

Puzzle Doubles are two great products in one! Each Find It! Puzzle in the Puzzle Doubles series includes a giant 50-piece 2' x 3' beautifully illustrated "talk about" floor puzzle. Once the puzzle is completed the fun does not stop there. Now the puzzle becomes a game! Also included with each puzzle are two sided game pieces that match the objects located on the puzzles' borders. You can play the game in two ways: 1) Object Recognition - by having the child place a game piece over the object on the border once it is located inside the illustration. 2) Word Recognition - Flip over the game piece and the name of the object appears. As the object is identified in the illustration, place the word game piece over the same object located on the picture's border. Puzzle Doubles are a fun and educational tool for all early learners. Recommended for ages three and up.

Item #695180
