

Garden Gazebo

GZ-LP

Assembly Instructions

***WARNING* Heavy! Handle with care! Keep children away from assembly area!**

Tools Required: Adjustable wrench and Philips screwdriver (+ plus driver).

Parts List:

Frame Piece Lower	4	Support Spans	4
Frame Piece Upper	4	Top Pieces	4
Arbor Top Spires	1	Bolt, Nut, Flat & Lock Washer	8sets

- 1st) Verify that all part from the part list are present before you begin assembly and read all instructions before you begin.
- 2nd) Begin by assembling the top of the Gazebo. First align the 2 holes in the first support span with the 2 holes in one side of the Top Spire. Use a Bolt, Flat & Lock Washer and Nut to secure to Top Spire. Follow this procedure for the 3 remaining Top Pieces.
- 3rd) Next assembly the 4 frame pieces by slipping the female ends of the upper piece over the male ends of the lower piece. The lower frame piece will have 2 silver feet on each of the frame pieces. Follow this to assembly the 3 remaining Frame pieces.
- 4th) After all 4 frame pieces are assembled slip the female end of the Support Spans over the male ends of the Frame Piece Assemblies. After all 4 support spans are in place this will allow the Gazebo to stand on its own.
- 5th) Next attach the Top Assembly to the Frame Piece Assembly. To do this slip the female ends of the Top assembly onto the male ends of the Frame Piece Assembly.
- 6th) After all parts are assembled make sure that every thing is tight and all slip joints are secure.
- 7th) ***CAUTION** this product is made of cast metal and is brittle. Never force any part of the assembly to fit as it may cause damage.

Oxidation of cast iron: The cast iron component of the product is finished with a powder coating process that protects the iron from rusting. However, due to the nature of the iron, rusting is inevitable. It is recommended that the consumer touch up any surface that is scratched or damaged due to wear and tear. Applying an epoxy clear coating is recommended once a year.

Aluminum: The products with aluminum components please be reminded that aluminum is soft metal it is therefore necessary to exercise caution when tightening nuts/bolts/screws on aluminum parts to prevent damaging the treads on the metal.

Solid Brass Fasteners: The fasteners provided are made with solid brass. This item will tarnish after weathering. A brass polish can be use to keep the screws shiny or you can leave it untouched to give it a patina/antique look.

Weathering of wood: The wood component of the product is treated with a penetrating oil stain that is designed to protect from the elements. However, it is recommended to re-stain the wood once a year (depending on the weather conditions in your area) to restore the beauty of the product and to prolong the life of the wood.

Please do not return product to place of purchase – for customer service issues please call 1-866-656-8666 to speak with customer service between the hours of 9am and 5pm Eastern Standard Time. You may also fax or E-Mail any questions or comments to 1-248-652-1105 / sales@oakland-living.com.
