General Assembly Tips:

Most pieces in all of the sets can be assembled in several different ways. By flipping the piers and rotating the beams, the configurations can be made more challenging, easier, or different to increase the enjoyment!

The example above illustrates how flipping the H Shape Pier(A) and Stairs(B) allow the Beam(E) to rotate and connect to the narrower slots, resulting in a narrower beam.

This allows a large variety of configurations and creative experimentation is encouraged.

The following pages show an example of one suggested configuration for each set.

ELR-0788 3 pc. Climb & Play Set

1. Connect the Beam(E) to the Stairs(B) as shown.

The Stairs(B) can be flipped to allow the Beam(E) to rotate and connect to the narrower slots, resulting in a narrower beam (not shown). The Beam(E) can also be rotated to any of 4 sides to access different patterns for variety.

2. Make sure Beams(E) are fully inserted and locked into position before use.
