8000C LED task light

<b>Model</b>	8000C
<b>UPC</b>	885885001300
<b>Electrical</b>	110V or 220V
<b>Type</b>	Table mount with c-clamp
<b>Number of diodes</b>	28
<b>Head &amp; neck</b>	7.2 cm diameter, 66 cm long
<b>Color temperature</b>	6500-7500K (Kelvin)
<b>Heat generated</b>	10°C vs. 60°C for halogen
<b>Power consumption</b>	0.2W
<b>Hours of use</b>	Up to 60,000 hours
<b>Electrical cord</b>	UL Listed
<b>Box dimensions</b>	43.5 x 23 x 7.5 cm
<b>Master carton</b>	46 x 43.5 x 35 cm
<b>Shipping weight</b>	1.6 kg
<b>Master carton weight</b>	16.5 kg
<b>Warranty</b>	Reliable™ 1 Year Warranty

#### DESCRIPTION

The ÜberLight 8000 series is a new generation LED task light from Reliable Corporation.

Our 8000 series light fixture uses 28 LEDs (light emitting diodes), and advanced circuitry to produce a beautiful "white" natural light that is very easy on the eyes and reproduces colors as they truly are.

For tasks that require a concentrated amount of light, without generating heat (60% less compared to halogen), and impervious to vibrations (there is no filament unlike incandescent or halogen bulbs) the 8000 series is the perfect choice.

LEDs are simply the most efficient lighting source in the world. They are the most energy efficient, they produce the least amount of heat, and they last the longest. Plus the light they produce is as bright as it is brilliant. Nothing else even comes close!

The life expectancy of our LEDs is up to 60,000 hours. Compared to traditional bulbs, our 8000 series is up to 99% more energy efficient.

The 8000C is easy to install and set-up, and is suitable for any 110V or 220V electrical outlet.

#### BEST USED FOR

Hobbyists, crafts, workbenches (all types), industrial sewing & embroidery machines

#### FEATURES

- Life expectancy of up to 60,000 hours
- 28 energy efficient LEDs
- Works on either 110V or 220V
- C-clamp has 4.5 cm opening
- 66 cm long flexible neck
