EE	520-2005	4	M5 x .8 x 10 mm phillips screw
FF	590-5003	4	retaining spacer

AA **BB** **CC** **DD** **FF**

INTERFACE BRACKET FASTENERS
Refer to TV mount instructions for interface bracket attachment.

EE

1 **This product is designed to accommodate screens with VESA® compliant hole pattern. For safe mounting, please make sure that mounting screws turn at least three complete turns in the screen inserts.**

FOR VESA 75 MOUNTING PATTERN: 1.) Choose hole pattern indicated below. 2.) Attach adapter bracket (**AA**) to back of monitor using four M4 x 10 mm screws (**BB**) as indicated below. 3.) If hole pattern is in a pocket, attach adapter bracket (**AA**) to back of monitor using four M4 x 20 mm screws (**CC**) and four retaining spacers (**GG**) as indicated below.

FOR VESA 100 MOUNTING PATTERN: 1.) Choose hole pattern indicated below. 2.) Attach adapter bracket (**AA**) to back of monitor using four M4 x 10mm screws (**BB**) as indicated below. **Note:** If installing LCD screen model Sharp® LC-13E1U, LC-15E1U, LC-20E1U, or if you don't get three complete turns in the screen inserts, use four M4 x 12 mm screws (**DD**) instead of four M4 x 10 mm screws (**BB**).

AA

For monitors with a hole pattern in a pocket, spacers (**GG**) go between adapter bracket (**AA**) and monitor.

AA

Monitor may appear slightly different than illustrated
