

## Care and Maintenance Instructions The elephantrunk™ Parcel Drop

As with all products exposed to the outdoor elements, your elephantrunk™ will require some periodic cleaning and maintenance to keep it looking nice and extend its useful life. The maintenance frequency depends on where you live and how well your product is protected from the sun and weather. Products in harsher environments require more frequent care. As a general guideline, if your product begins to look dirty or weathered, it's time to clean it. Please follow these simple guidelines for the different materials used in your product:

**Cleaning and restoring powder coated (painted) surfaces:** Rinse the surfaces with clean water to remove all debris and grit buildup. Gently clean the surfaces with a mild soap and water. To remove stubborn blemishes or to help restore the original finish or color, use an automotive wax or a light lubricant such as WD40.

**Protecting your elephantrunk™ from the elements:** Although weather is always a key factor in the design of any outdoor product, we recommend that you place your parcel drop in a covered area. We also advise that you redirect any sprinklers to prevent them from hitting the elephantrunk™ as this will reduce the life of the finish. Choose a protective location, such as on a porch or under an eave, and away from sprinklers.
