Installation Notes

Install this product according to the installation guide.

Floor support under whirlpool must provide for a minimum of 86 lbs/square foot (421 kg/square meter) loading.

Cast iron whirlpools are extremely heavy, making some drop-in installations difficult. Splitting the deck/surround is recommended if installing into a deck.

A pump/control access panel is required.

The drop-in cut-out dimension should be 65-1/2" (1663 mm) x 35-1/2" (901 mm) maximum.

Pump/piping protrudes beyond rim (see below).

Hot water supply should be 70% of capacity or greater. Installations will vary.
