

Product Information

Applicable product:	
Wall-mount kitchen sink faucet	K-6228
Lever handles are ADA compliant.	ADA

Installation Notes

WARNING: Risk of property damage. For exterior wall installations, ensure proper wall insulation to prevent frozen pipes.

NOTICE: Do not locate the faucet in close proximity to a direct heat source or use the faucet as a pot filler. Exposure to excessive heat will damage the integral sprayhead and spout joints and may cause severe discoloration to the carbon fiber tubing.

Special framing and support considerations are required to mount the wall-mount valve.

WARNING: Risk of property damage. Before finishing the wall, ensure the supply lines are connected to the mixer valve with the **cold** supply line plumbed on the **left** and the **hot** supply line plumbed on the **right**. Doing so will avoid replacing the finished wall due to error.

Install this product according to the installation guide.

One 2-1/8" (5.4 cm) diameter cutout hole is required for the valve. One 1" (2.5 cm) diameter cutout hole is required for the spout.

Lower flow aerator options are available. Please refer to the Kohler Price Book.
