

LIGHTING

JOSÉ A. GANDÍA-BLASCO

BRASERO Firepit

0,07 m³ - 2,47 ft³ 5,6 Kg - 12,32 lbs

0,29 m³ - 10,24 ft³ 18,7 Kg - 41,14 lbs

Made of stainless steel. We recommend using denatured alcohol because it has a clean and clear flame and it does not produce residues nor smoke when burning. Max. capacity recommended 3/4 gallon. See Technical Specifications.

TECHNICAL SPECIFICATIONS

For outdoor use or in draughty areas. Place on a flat, non-slip, non-flammable surface. Pour the liquid in the brazier and light it carefully with a match. Do not fill it or manipulate the container with flammable liquid while burning. After putting out the flame, let it cool down for a while before manipulating it. Keep away from children. Bioethanol is recommended for its clean and clear flame which does not produce residue or smoke when burning nor smoke when burning.
