## Manual de instrucciones

**Model # is located by barcode.**  
Please write your model # on your sales receipt or below.  
**Le numéro de modèle se trouve à côté du code-barres.**  
Veuillez inscrire le numéro de modèle sur votre reçu de vente ou ci-dessous.  
**El número de modelo está ubicado al lado del código de barras.**  
Sirvase escribir el número de modelo en el recibo de compra o debajo.

Model Number: \_\_\_\_\_

20017399-F AA

### ENGLISH

To begin your Waterpik® brand shower experience we want to give you all of the proper tools to make installation easy and quick. This way you are that much closer to enjoying an invigorating shower with your new shower head.

You can access more products and information on your product at [www.waterpik.com](http://www.waterpik.com).

For this model we have created installation videos that are available online. You can access them at our website [www.waterpik.com](http://www.waterpik.com) or scan the QR code below with your smart phone.

**Note:** All pictures and images depicted in the videos and this manual may not directly illustrate your shower head.

ACCESS AN INSTRUCTIONAL VIDEO ONLINE

### PRIOR TO INSTALLATION

• Write down your model number in the allotted space above. (Model number is found on the packaging near barcode.)

If you do not have the package you may find the model number on our website [www.waterpik.com](http://www.waterpik.com).

• Remove old shower head and remove all pipe tape as well.

• Insure that the washer from the old shower is not connected to the pipe. Use a thin utensil to check inside the pipe for washers, such as a pencil or screw driver. **Do not use your fingers.**

• Gather the tools necessary to install your new shower head.

Adjustable Wrench or Pliers (not included)

### INSTALLATION

#### Type A Bracket:

- 1 Tighten pivot ball to pipe. Slightly loosen large nut on bracket assembly and position hose connection downward. Ensure large nut is secure by hand tightening.
- 2 Connect either end of hose to bracket and hand tighten. (See note below.)
- 3 Connect other end of hose to hand-held shower head and hand tighten.
- 4 Place hand-held shower head in bracket.

#### Type B Bracket:

- 1b Tighten metal nut to pipe using necessary tools. Do not over tighten.
- 2b Connect either end of hose to bracket and hand tighten. (See note below.)
- 3b Connect other end of hose to shower head and tighten.
- 4b Place handheld shower in the bracket.
- 5b Rotate bracket forward or back to adjust the spray angle.

**Note:** Several U.S. state and local municipal plumbing codes require the use of a backflow prevention device when installing a hand shower. This device is termed a vacuum breaker. Please contact us at **1-800-272-0741** (U.S. calls only) for information on how to obtain a packaged vacuum breaker assembly which contains a vacuum breaker unit 20009558.

### OPERATION

#### Spray Selector:

Spray Selector allows you to select from various spray patterns. On some models spray pattern is controlled by the small lever that rotates left and right. Some models do not have a small lever. Rotate the trim ring around the face of the shower head to change settings.

#### EasySelect® Spray Selector(some models):

On some models spray pattern is controlled by a rotating ring on the handle. Rotate selector in either direction to control pattern.

### SPECIAL FEATURES FOR SELECT MODELS

#### Water Saving Trickle Setting (some models):

To use the water saving trickle, simply push the toggle switch on the back of the shower head. This will reduce water flow to approximately 0.5 gallons per minute. To return to original setting, push toggle on other side of shower head.

#### Hybrid Power Dial (some models):

Move dial left and right to customize any spray setting. Select from full power to an eco power to conserve water.

#### Extension Clip (some models):

If, following installation, the position of the shower head is too high, you may install the included extension clip.

Slide the clip onto the shower head from the side. Rotate the clip 90 degrees so that it extends off the rear of the shower head. Slide the clip into the bracket.

#### WARNING:

- 1 To avoid hot water dangers and conserve even more energy, make sure your water heater is set at 120°F (48.9°C) or below.
- 2 Test the tub/shower water with your hand before bathing.
- 3 For additional safety for EcoFlow® or high efficiency shower heads, it is recommended that all homes have installed a pressure balance tub and shower valve with the rotational limit stops properly set by a plumber.
- 4 **For external use only.** The potentially deadly amoeba, *Naegleria fowleri*, may be present in some tap water or unchlorinated well water.

### CARE AND CLEANING

- To maintain proper working conditions cleaning is required when mineral deposits appear on the spray orifices. To clean mineral deposits, gently rub the rubber nozzles on the face of the shower head to dislodge.
- To clean heavier deposits, remove shower head and soak face down in 1-2 cups of white vinegar (use white vinegar only) for about 2-3 hours. Replace shower head and run in each mode to flush out vinegar.
- Do not clean or rinse any part with harsh chemicals, heavy duty cleaners, or abrasives; this may damage parts or finish and will void warranty.
- Clean filter screen by unscrewing from the pivot ball and rinse by back flushing to remove particles. Follow steps 1-3 under installation to reinstall shower head.

### TROUBLESHOOTING GUIDE

Problem	Solution
No water flow from installed shower head.	a Confirm previous shower washer is not in the j-pipe. b Confirm there is only one washer in the pivot ball. c Confirm that the shower head hose is installed properly by following step 2.
Low water pressure or missing spray patterns.	a Clean shower head in vinegar/water solution. (See care & cleaning section). b Clean filter screen.
Leaking at pipe/pivot ball connection.	a Confirm only one washer is seated on top of the screen. b Grate bar of soap across the j-pipe threads to act as a sealant.
Bracket is too stiff to change angle	a Install bracket to provide additional leverage to change angle of spray (contact Water Pik for further instructions).

### LIMITED LIFETIME WARRANTY

Water Pik, Inc. warrants to the original purchaser of this product that it is free from defects in material and workmanship for as long

as the original purchaser owns this product. Water Pik, Inc. will replace any part of the product which in our opinion is defective, provided that the product has not been abused, misused, altered or damaged after purchase. (This includes damage due to use of tools or harsh chemicals.) In the event an item has been discontinued we will replace with what we deem to be the closest product. Water Pik, Inc. is not responsible for labor charges, installation, or other consequential cost. The responsibility of Water Pik, Inc. shall not exceed the original purchase price of the product. This warranty gives you specific legal rights. You may also have other rights that vary where you reside. Save your receipt as proof of purchase is required for warranty action.

### FRANÇAIS

Pour que vous puissiez tirer tout l'agrément possible d'une douche avec le système de douche Waterpik®, nous voulons vous permettre de réaliser l'installation aussi facilement et rapidement que possible. Vous pourrez ainsi prendre votre première douche sans délai avec votre nouveau système de douche.

Vous pouvez accéder à plus de produits et d'informations sur votre produit à [www.waterpik.com](http://www.waterpik.com).

Pour ce modèle nous avons réalisé des vidéos décrivant le processus d'installation (accès en ligne sur notre site Internet [www.waterpik.com](http://www.waterpik.com), ou bien accès par lecture du code QR ci-dessous avec un téléphone portable adéquat).

**Note :** Les illustrations incluses dans le manuel et les images des vidéos peuvent ne pas représenter exactement le produit acheté (douchette).

ACCÈS EN LIGNE À LA VIDÉO D'INSTRUCTIONS

### AVANT L'INSTALLATION

• Inscrire dans l'espace ci-dessus le numéro de modèle du produit (le numéro de modèle du produit figure sur l'emballage, à proximité du code barre).

Si l'emballage du produit n'est plus disponible, on peut trouver le numéro de modèle du produit sur notre site Internet [www.waterpik.com](http://www.waterpik.com).

- Retirer la douchette existante; éliminer également les résidus de composé d'étanchéité des tuyauteries.
- Veiller à ce que le joint de la douchette existante ne reste pas attaché sur le tube d'alimentation. Utiliser un ustensile mince tel un crayon ou un tournevis pour vérifier qu'aucun joint ne se trouve à l'intérieur du tube d'alimentation. **Ne pas utiliser les doigts.**
- Rassembler les outils nécessaires pour l'installation de la douchette manuelle.

Clef à molette ou pince (pas inclus)

### INSTALLATION

#### Support de type A :

- 1 Serrer le raccord articulé sur le tuyau. Desserrer légèrement le gros écrou du support et orienter le raccord du tuyau vers le bas. S'assurer que le gros écrou est solidement fixé en le serrant à la main.
- 2 Connecter l'une des extrémités du tuyau au support et serrer à la main. (Voir la remarque ci-dessous).
- 3 Connecter l'autre extrémité du tuyau sur la douchette manuelle et serrer à la main.
- 4 Placer la douchette manuelle dans son support.

#### Support de type B :

- 1b Serrer l'écrou métallique sur le tuyau avec les outils adéquats. Ne pas trop serrer.
- 2b Connecter l'une des extrémités du tuyau au support et serrer à la main. (Voir la remarque ci-dessous).
- 3b Connecter l'autre extrémité du tuyau sur la douchette manuelle et serrer à la main.
- 4b Placer la douchette manuelle dans son support
- 5b Faire pivoter le support vers l'avant ou vers l'arrière pour régler l'angle d'aspersion.

**Remarque :** Plusieurs codes de plomberie fédéraux et municipaux locaux des É.-U. requièrent l'installation d'un dispositif de prévention de reflux pour l'installation d'une douchette manuelle. Ce dispositif est connu sous le nom de brise-vide. Pour des informations sur l'obtention d'un brise-vide sous emballage (avec brise-vide numéro 20009558), nous contacter au **1-800-272-0741** (appels aux É.-U. uniquement).

### UTILISATION DU PRODUIT

#### Sélecteur du mode d'aspersion :

Le sélecteur du mode d'aspersion permet de choisir l'un des modes d'aspersion disponibles sur la douchette. Sur certains modèles, le pivotement d'une petite manette (vers la droite ou vers la gauche) permet la sélection du mode d'aspersion. Certains modèles ne comportent pas de petite manette. Pour modifier les réglages, faire pivoter la rondelle de garniture autour de l'avant de la douchette.

#### Sélecteur du mode d'aspersion EasySelect® (sur certains modèles) :

Sur certains modèles, la rotation (dans un sens ou dans l'autre) d'une bague sur la poignée de la douchette permet la sélection du mode d'aspersion.

### CARACTÉRISTIQUES UNIQUES POUR CERTAINS MODÈLES :

#### Fonction de Ruissellement éconergique (sur certains modèles) :

Pour utiliser le Ruissellement éconergique, il suffit d'appuyer sur le bouton de changement d'aspersion situé à l'arrière de la douchette. Cela réduit le débit de l'eau d'environ 0,5 gallons par minute. Pour revenir au mode d'aspersion d'origine, appuyer sur le bouton de changement d'aspersion situé de l'autre côté de la douchette.
