

# SNOW JOE ULTRA MODEL SJ620

## Electric Snow Thrower

Responding to the need for an easy-to-use machine that could tackle heavier snowfall on large driveways and walkways, Snow Joe® developed the Snow Joe® Ultra SJ620, a larger electric snow thrower that delivers the power of a gas machine with the convenience of an electric unit. Driven by a 13.5-amp motor, the Snow Joe® Ultra moves up to 650 lbs of snow per minute. Its durable, 4 blade rotor, constructed of heavy grade steel, cuts a full 18-inch wide and 10-inch deep with each pass, clearing 2450 square feet per hour.

In addition to its hard-working plowing capacity, the Snow Joe® Ultra features an adjustable discharge chute that rotates a complete 180° to provide full control over the snow discharge direction. The chute deflector can also be adjusted to control the height of the snow stream. Easy-glide pivot wheels make the Snow Joe® Ultra easy to turn and maneuver on each pass. The scraper blade at the base of the unit efficiently scrapes the snow clear to the pavement.

Like the Snow Joe® 322P, the Snow Joe Ultra SJ620, is powered electrically, making it effortless to start and maintain. No gas, oil, or tune-ups are necessary. The unit is ETL-approved and carries a full two year warranty. For heavier snowfall on large driveways and walkways, the Snow Joe® Ultra SJ620 is your smart solution this winter.
