

# Half Rounds

## Vinyl-Covered Foam Supports

- Great positioning tool during therapy sessions.
- Perfect for use under your knees, ankles or neck.
- Handle allows for easy mobility.
- Durable vinyl wipes easily clean.

### All-Purpose Positioning Aids

Our foam Half Rounds are durable aids for clinical treatment or home use. They provide support under the knees, ankles, or behind the neck during treatment. The half oval shape provides a more subtle elevation and more stable positioning.

### Durable Materials

Each Half Round is constructed from precision-cut, high-quality foam, and comes encased in an easy-to-clean vinyl cover. Each support also comes standard with a heavy-duty positioning strap, making it easy to reposition.

### Provides Support

These supports are half the height of regular bolsters, giving you the comfort and support you need without adding extra bulk. Our Half Rounds are available in 6" and 9" widths. Both sizes are 24" in length, making them easy to use with most standard treatment tables and nearly all of your clients.
